

Dear Principal

10/18/07

Teacher Training/Education programs at Seattle Central Community College is offering a fantastic state work study program funded through a grant from the Higher Education Coordinating (HEC) Board, entitled *Tutors-2-Teachers*. The program is intended to encourage students taking high level math & science classes at SCCC, to explore careers in math and/or science education. Students eligible for state work study are to be placed in middle school and high school math or science classrooms. They will work alongside your math and science endorsed teachers, offering aid by tutoring the students and assisting the teachers.

This program comes at **absolutely no cost to your school**, as we will be paying the tutors from our budget at a rate of \$13.00 per hour. We are actively recruiting students who show high aptitude in their current math and science courses. It is in our hopes that this program will not only strengthen your student's math and science skills, but through the experience of working alongside your teachers, our tutors will decide to become teachers.

Lance Watkins, will be coordinating the program. **If you are interested in hosting this program at your school, please respond to this email. Please identify the appropriate contact personnel at your school.** In addition, please let us know of additional staff Lance may need to contact in order to arrange student background checks/fingerprinting etc. Our students could assist in a math or science classroom as well as with an after school tutoring program. If you have any additional questions, please call me. I look forward to working with you to enrich our student's math and science education in our public schools.

Sincerely,

Lisa Saunders, M.Ed
